

**Congratulations on getting your pet microchipped with a HomeAgain microchip! You've made a smart choice to increase the chances of having your pet returned to you should it get lost.**

Here are a few points of interest regarding the registration of the chip:

- You will get confirmation of registration by HomeAgain via e-mail or US mail in about 4-8 weeks. They'll give you information so you can go to their website and update your registration information as needed. This is especially important if you move or your phone numbers change.
- They will also send you information regarding the Lost Pet Medical Insurance and tell you how to sign up. Your pet isn't automatically included in this-you have to sign up for this added benefit. This is free the first year.
- Your pet's microchip number will ALWAYS be registered with HomeAgain.
- In 1 year, you will be sent 1-2 notifications to renew your annual membership. They will make it sound like you **HAVE** to renew. They are a respectable company and are not trying to be deceitful, but they are a business and trying to generate income.
  - YOU DO NOT **HAVE** TO RENEW ANYTHING IN 1 YEAR, but
  - You **MAY** renew if you wish--this renews the Proactive Recovery System. This is where **YOU** call in a Lost Pet Report when your pet runs/gets away, and the HomeAgain network actively works to find, identify, and return your lost pet. It also renews the Lost Pet Medical Insurance. You only have to renew if you would like to keep these additional services. They were free the first year.
- Your pet's microchip number will ALWAYS be registered with HomeAgain in their database, even if you do not renew the Proactive Recovery System.
